

## Use eeTerminal with Files

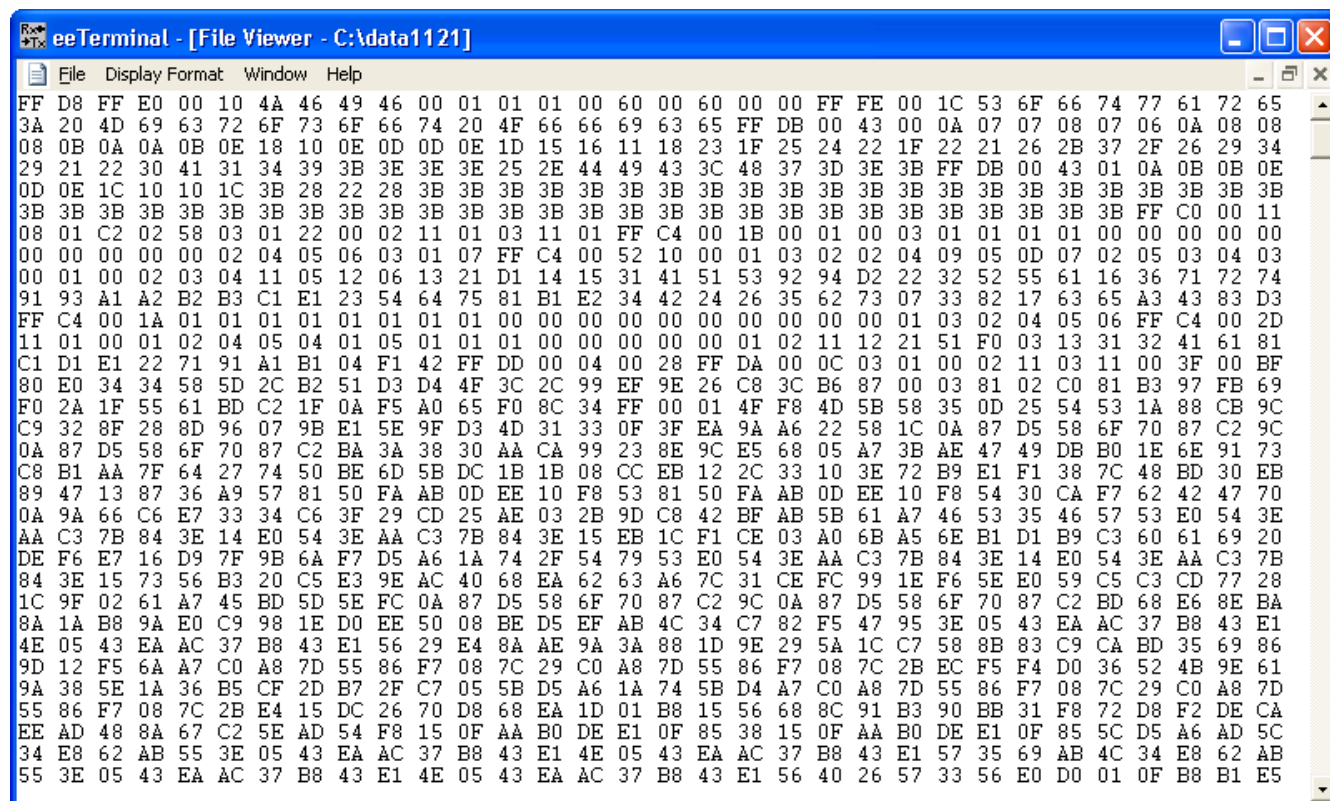

Figure 1

Start eeTerminal application by double clicking eeTerminal icon .

1. **Open File.** Select **File** from menu bar and select **Open File** to open a file, or click  on a device's toolbar to open a file.
2. **Open Device.** To open a device within a file window, select **File** from menu bar, and select **Open Device**. The software lists all compatible devices in a pop-up window. Select a device from the list and click the **Open** button. Window arrangement tools are under **Window** menu. The device window and file window can be placed side by side horizontally or vertically.
3. **Display Format.** eeTerminal supports data display in ASCII, HEX, and Decimal. Click on the **Display Format** on the menu bar to change between ASCII, HEX, and Decimal.
4. **Browse data.** Use the scroll bar on the right side of the window, up arrow key, and down arrow key.
5. **Close File.** Select **File** from menu bar and select **Close**, or click on the windows Close button.
